1.0	Divay Garg, Graduate Engineer Trainee	Initial Draft	03/07/2026

3. Introduction

MagicPin is a hyperlocal deals and ordering application designed to help users discover nearby stores, restaurants, and offers based on their location, category preferences, and available discounts/coupons. The application allows users to grant location access, browse deals near them, filter and sort offers, place orders, and redeem coupons or Magic Coins. This test plan defines the testing approach and scope required to validate the functional behavior, usability, and reliability of the MagicPin application.

4. Test Items

Specifies **what components/modules** will be tested.

Example:

- User Registration Module
- User Login Module
- Location Access Moule
- Profile Management Module
- Coupons & Magic coins Module
- Fine Dining Module
- Checkout/ Cart Module
- Logout Functionality

5. Features to be Tested

Medium priority features are features that have been stable and High Priority features are features that have been recently changed.

Feature to be Tested	Priority	Comments
User Registration	High	
User Login	High	
Location Access	High	
Profile Update	High	
Coupons & Magic coins	High	
Fine Dining	High	
Checkout/Cart	High	
Logout	High	

6. Features NOT to be Tested

- Help Contents and user manuals will not be tested.
- Installation and presentation will not be tested.
- Support of the other architectures also will not be tested.
- Third-party payment gateway internal logic
- Legacy modules not impacted by current release
- Experimental features

8. Test Approach / Test Strategy

Describes **how testing will be performed**.

The test strategy for MagicPin1.0 will include manual testing with automated testing(**Selenium With Java**) where time/need permits. Automated testing will be used to test the basic Interface objects keyboard and mouse navigation or any redundant tasks best translated to automation. Automated testing will be limited to a Win-64 platform because of Automation tool limitations.

- Sanity test will include an very short battery of tests to ensure the Naukri1.0 runs/launches and can connect to the back end database(**MySQL /SQL Server 2025**). Test execution will happen as individual component testing. These tests will be fully automated.
- **Acceptance tests** will include a short battery of tests that will only touch major features to ensure Naukri1.0 will operate smoothly at a basic level. These tests will be executed on **Windows 11 Home Single Language**. The goal will be to automate all of these tests.
- Full Functional tests will include a **comprehensive test** of all features listed in this document. These tests will be limited to the Windows 11 pro. These test will include automation with time allowing.

8.1 Types of Testing

- Smoke Testing
- Sanity Testing
- Functional Testing
- Integration Testing
- System Testing
- Regression Testing

8.2 Test Levels

- Unit Testing (by developers)
- Integration Testing
- System Testing
- Acceptance Testing

8.3 Test Techniques

- Black Box Testing
- Boundary Value Analysis
- Equivalence Partitioning
- Error Guessing **Functionality Testing**

Usability Testing

The usability testing will be accomplished by verifying the information in each window are accurate. Menus, icons and toolbar functionality will be tested as applicable to the navigation and results panes. Multi Window Overlapping will be tested because product supports opening of multiple documents.

Robustness/Reliability Testing

Test the GUI for correct keyboard and mouse navigation, windows, menus, buttons, etc. These tests will include Keyboard only navigation of MagicPin1.0, Mouse only navigation. Correctness and existence of warning/error dialog boxes. The correct/expected functionality of buttons, icons and menus.

Stress Testing

Not applicable

9. Entry and Exit Criteria

9.1 Entry Criteria

Conditions to start testing:

- Requirements approved
- Test environment ready
- Test data available
- Build deployed

9.2 Exit Criteria

Conditions to stop testing:

- All planned test cases executed
- Critical and high defects closed
- Test summary report prepared

10. Test Deliverables

13. Risks and Assumptions

Risks:

- **Environment Instability:** Delays in setting up the test environment could impact the schedule- VM is not working port no.-5103
- **Resource Availability:** Limited availability of testers could delay test execution.
- **Late Requirement Changes:** Changes in requirements during the testing phase could lead to additional testing efforts.
- **Contingencies:**
- **Backup Resources:** Have backup resources ready to join the testing effort if required.
- **Flexible Schedule:** Allocate buffer time in the schedule to accommodate unexpected delays.

- **Regular Communication:** Hold daily stand-up meetings to quickly address any issues that arise
