

Project Name:	Patient Management and Appointment Booking		
Module Name:	Patient Registration	Date Updated:	10-07-2026
Last Build Tested:		Reviewed By:	Raghavendra BN
Run No:	5 Test cases	Executed By:	Divay Garg
Run Date:	09-07-2026		
Test Objectives:	Mapping Test Scenarios with Test Cases (Patient Management and Appointment Booking)		
Test Setup:	MS Excel Sheet		
Req Id	Test Case ID	Test Case Description	Test steps
FR_1.0	TC_01	Verify successful initaition of registration with valid mobile and email	Given the user is on the Patient Registration page When the user enters a valid, unregistered mobile number and email address And clicks the "Register" or "Send OTP" button
FR_1.0	TC_02	Verify customer registration with an already registered mobile number	Given the user is on the Patient Registration page When the user enters a mobile number that is already registered in the system And clicks the "Register" button
FR_1.0	TC_03	Verify customer registration with invalid email format	Given the user is on the Patient Registration page When the user enters a valid mobile number And enters an email address missing the "@" or domain And clicks the "Register" button
FR_1.2	TC_04	Verify user's identity using valid OTP	Given the user enters valid registration details And the user is on the OTP verification screen When the user enters the correct OTP And clicks "Verify"
FR_1.2	TC_05	Verify customer's identity failure with invalid/expired OTP	Given the user is on the OTP verification screen When the user enters an incorrect or expired OTP And clicks "Verify"
FR_1.1	TC_06	Verify successful patient profile creation with madatory details	Given the user passes OTP verification And the user is on the Profile Creation screen When the user enters valid mandatory details (Name, DOB, Gender) And clicks "Save Profile"
FR_1.1	TC_07	Verify profile creation failute when madatory fields are blank	Given the user passes OTP verification And the user is on the Profile Creation screen When the user leaves mandatory fields (Name, DOB) blank

Test Data	Expected Result	Actual Result	Status
Mobile: 9876543210 Email: patient@test.com	Then the system accepts the credentials And sends an OTP to the mobile number and email And navigates the user to the OTP verification screen	OTP was successfully sent on number and was navigated to OTP screen	Passed
Mobile: 9876543210 (Existing)	Then the system blocks the registration attempt And displays the error message: "Mobile number already exists. Please log in."	Registration was blocked and an error was displayed	Passed
Email: patienttest.com (Invalid)	Then the system prevents form submission And displays a validation error: "Please enter a valid email address."	Submission of the password prevented and a validation error displayed.	Passed
OTP: *****	Then the system verifies the identity successfully And navigates the user to the Profile Creation screen	OTP was verified successfully and system navigated to Profile creation	Passed
OTP: 000000 (Invalid)	Then the system denies verification And displays the error message: "Invalid or expired OTP. Please try again."	Verification of the identity was failed and an error message was displayed	Passed
Name: abc xyz DOB: 12/05/1990 Gender: Male	Then the system creates the patient profile successfully And generates a unique Patient ID And navigates the user to the Patient Dashboard	Profile created successfully, navigated to Dashboard	Passed
Name: [Blank] DOB: [Blank]	Then the system prevents profile creation And highlights the required fields with validation messages	Profile creation was blocked and validation messages were displayed	Passed
